OConfirmation Process

Ocf

B

Select a Wallet

OConfirmation currently supports Metamask and Fortmatic wallets.

Step 2

Keeper Review

Keepers assess the risk of your request, and gas is deducted from the result on approval.

Step 4

Reclaim BTC

Simply use any DEX that integrates RenVM to burn RenBTC and recover your Bitcoin.

Step 1

Deposit Bitcoin

Send BTC to an address generated by a RenVM Darknode.

Step 3

Swap

Liquidity is drawn from 0Confirmation's pool, and Dai is sent to your connected wallet.

Step 5
